### Staying Healthy with Doctor Visits

One of the most important things we can do is make sure young children are as safe and healthy as possible. Eating nutritious foods and getting exercise are great ways to take care of children and ourselves, and so are routine health care visits! Children may have questions or worries about visiting the doctor, so it helps them to know what to expect at visits. Each child should also know that there is a whole team of people to help them stay well — and that they're an important member of that team, too! This month, [Sesame Street in Communities \(SSIC\)](#) is sharing resources to help you support children through healthy and not-so-healthy times, and to help them feel confident and reassured when visiting health care providers.
